ATTACHMENTS

Dear Sir/Madam,

The municipality of Peel en Maas would like to help you lower your energy bills. That is why, together with the Peel en Maas Energy Advice Centre, we are organising the 'Peel en Maas Sustainability' ('Peel en Maas Verduurzaamt') campaign. We are writing to you because you receive the 2023 Energy Allowance. This letter explains the campaign and tells you how you can make savings on your energy bills.

Free advice and two immediate modifications in your house

The Energy Coaches at the Peel en Maas Energy Advice Centre are happy to give you custom advice. All you have to do is book an appointment. The Energy Coach will visit your home and help you identify where you can save energy. At the same time, the Energy Coach will make two small changes. They may involve replacing an incandescent light bulb with an LED one or installing reflective foil behind your radiators. These two changes are free of charge. An added benefit is that you will start saving energy right away.

We will pay for the 150 euro package of measures

You will also receive free advice about additional energy-saving measures, such as draught-excluding strips and LED lighting. If you decide to proceed with the installation of these additional measures, then have the Energy Coach order the materials for you. Only then will we pay the costs of up to 150 euros per household for you. We are able to make this offer because the Energy Coach orders the materials from the WoonWijzerWinkel Limburg, an organisation we work with.

What do you have to do?

To take advantage of this offer, you need to do the following:

1. Book an appointment with a Peel en Maas Energy Advice Centre Energy Coach. Make sure that you have this letter to hand.

You can book an appointment by calling 077 – 720 10 95. The lines are open Monday to Thursday from 9:00 AM to 9:00 PM and on Saturdays from 9:00 AM to 1:00 PM. You can also book online at www.peelenmaasverduurzaamt.nl

The Energy Coaches' schedule means there will be about two weeks between booking the appointment and the home visit.

2. At the agreed time on the day of the appointment, the Energy Coach will come to your home to help you find ways you can save energy.
3. Together with the Energy Coach, you can identify the measures you want to get started with. The Energy Coach orders the necessary materials from the WoonWijzerWinkel Limburg. We will pay up to 150 euros per household towards the cost of the energy-saving measures.
4. You will receive the materials in the post.

5. If you need help installing the materials, discuss this with the Energy Coach who will arrange an appointment with the installation coach. This help is also free of charge.

Maybe we'll also replace an old white goods appliance

During the Energy Coach's visit, it may be decided to replace your old, inefficient white goods appliance with a new energy-efficient one. Old appliances often consume a lot of energy, so by replacing them we can reduce your energy consumption and save you money. The Energy Coach will decide whether you are eligible and which appliance will be replaced. Our partner for this campaign is EP:Tummers. If one of your old appliances is to be replaced, then EP:Tummers will take it away with them when they deliver the new one.

Save money by cutting your energy consumption

We are happy to provide you with the means to help lower your energy bills. By taking part in this campaign, you can start saving energy right away. That is good both for your wallet and the climate. We very much hope that you will welcome the Energy Coach. To book an appointment, go to www.peelenmaasverduurzaamt.nl or call: 077 – 720 10 95.

Any other questions?

If you have any other questions, please feel free to drop in at the Peel en Maas Energy Advice Centre (Energie Adviescentrum Peel en Maas) during our walk-in times on Mondays between 3:00 PM and 5:00 PM, Wednesdays between 10:00 AM and 12:00 noon and Fridays between 1:00 PM and 5:00 PM. The Peel en Maas Energy Advice Centre coaches will be happy to answer all of your energy-related questions.

Yours faithfully,

Erik Nijssen
Sustainability Alderman
